UI Wireframes & Screen List

7 screens that cover the complete demo flow - detailed enough for design and frontend work to start immediately

Design System (use across all screens)

Element	Specification
Colours	Primary #0B5D4B (deep green), Accent #E8A317 (amber), Surface #FFFFFF / #F7FAF9, Text #1D2A30. Rain scale: white -> light blue -> deep blue -> purple (0 / 2.5 / 15.6 / 64.5 / 115.6 mm, IMD rain categories). Temperature scale: blue -> yellow -> red.
Confidence	High = green pill, Medium = amber pill, Low = grey pill, always with text label (not colour alone).
Typography	Inter / Noto Sans (Latin), Noto Sans Telugu, Noto Sans Devanagari. Body 14-16 px; numbers 20-28 px bold.
Layout	Desktop: left sidebar (240 px) + content. Mobile (<768 px): bottom tab bar, full-width cards, map 60% height.
Components	Tailwind + shadcn/ui cards, tabs, select, badge, dialog; Leaflet maps; Recharts line/bar charts; lucide icons.

Screen Index

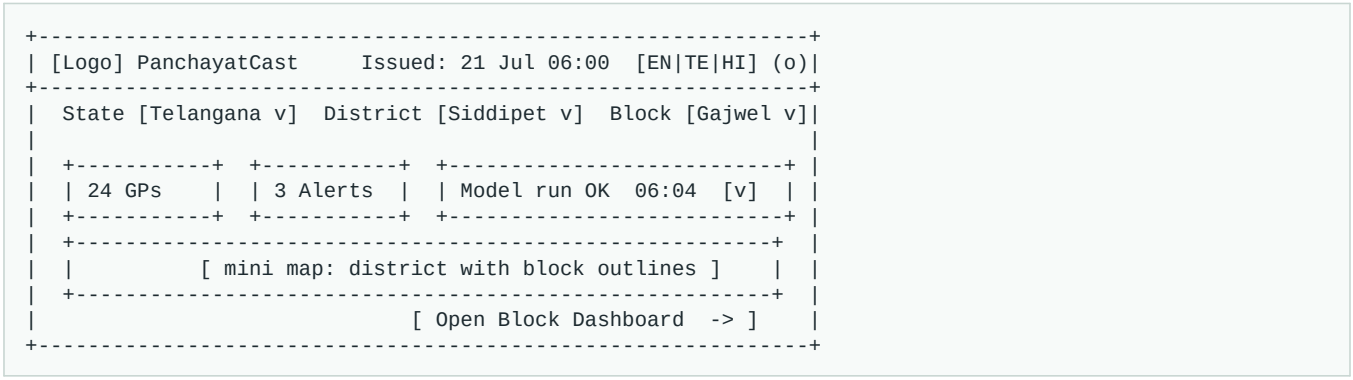
#	Screen	Used in	Primary user	Platform
S1	Region Selection / Home	Demo step 1	Extension Officer	Desktop + mobile responsive
S2	Block vs Panchayat Comparison Map	Demo step 2 (hero screen)	Extension Officer	Desktop + mobile responsive
S3	Panchayat Forecast Detail	Demo step 3	Extension Officer	Desktop + mobile responsive
S4	Crop Advisory Generator	Demo step 4	Extension Officer	Desktop + mobile responsive
S5	Share & Farmer Preview	Demo step 5	Extension Officer	Desktop + mobile responsive
S6	Model Validation & Accuracy	Demo step 6	Extension Officer	Desktop + mobile responsive
S7	Farmer Mobile View (public link)	Opened from the SMS/WhatsApp link	Farmer	Mobile-first

S1 Region Selection / Home

Demo step 1

Field	Details
Purpose	Entry point for the Extension Officer. Pick the area to work on and see today's status at a glance.
Key UI elements / components	• Top bar: logo, forecast issue date/time, language switch (EN / TE / HI), Demo Mode toggle, user avatar • Cascading selects: State -> District -> Block (searchable) • Summary cards: # panchayats covered, # active alerts, model run status (green tick + time) • Mini map of selected district with block outlines • Primary button: "Open Block Dashboard"
Data shown	Forecast issue time, pipeline status, count of panchayats, alert counts per block
Main actions	Select region; switch language; open block dashboard; toggle Demo Mode

Low-fidelity wireframe

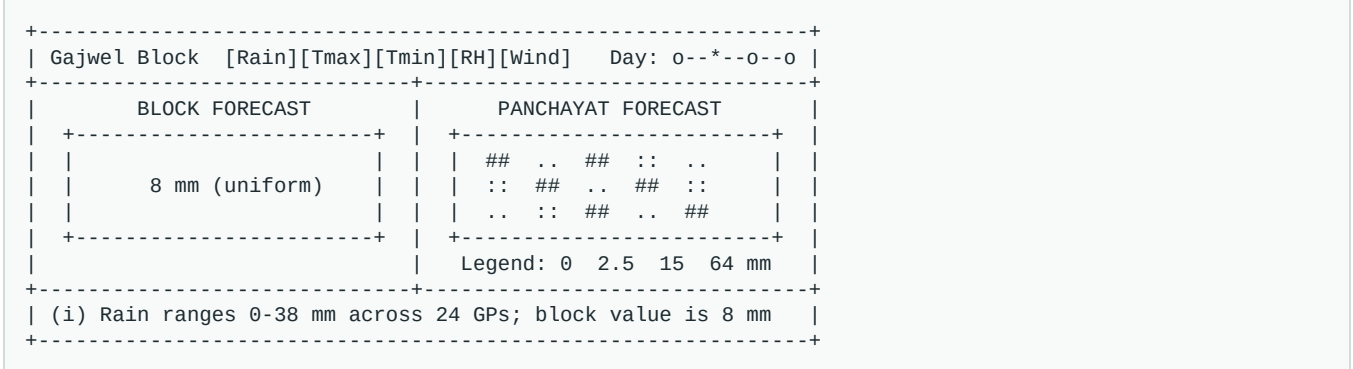


S2 Block vs Panchayat Comparison Map

Demo step 2 (hero screen)

Field	Details
Purpose	Show visually why downscaling matters: one flat block value vs rich panchayat-level variation.
Key UI elements / components	• Split view: left map = block forecast (single colour), right map = panchayat choropleth; synced zoom/pan • Variable tabs: Rain | Tmax | Tmin | RH | Wind • Day slider: Day 1 ... Day 5 (with dates) • Colour legend with units; hover tooltip: GP name, value, confidence • Insight chip, e.g. "Rain varies 0-38 mm across 24 GPs; block says 8 mm" • Mobile: toggle button (Block / Panchayat) instead of side-by-side
Data shown	Block forecast value; per-GP value (mean, min, max); rain probability; confidence per GP
Main actions	Change variable/day; hover for tooltip; click a panchayat to open S3; swap to single-map mode

Low-fidelity wireframe

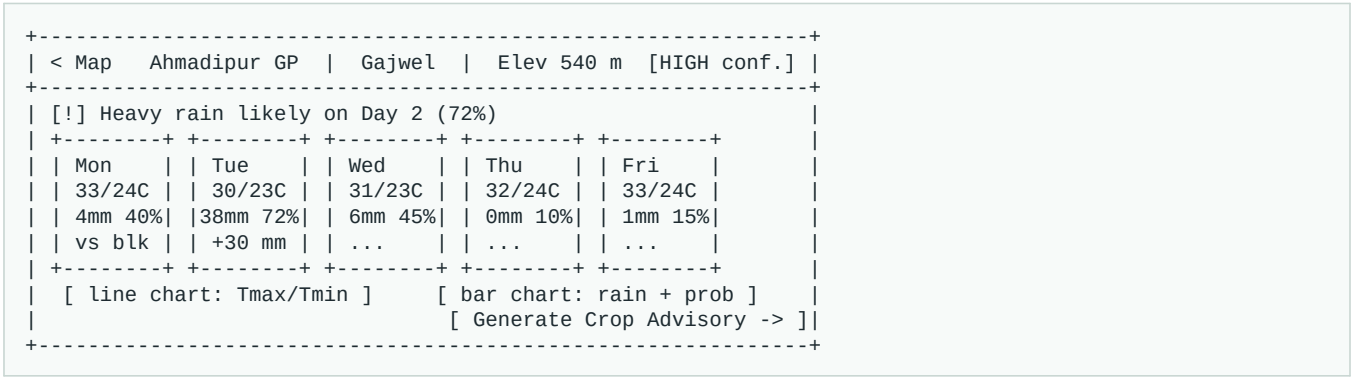


S3 Panchayat Forecast Detail

Demo step 3

Field	Details
Purpose	Give a trustworthy 5-day picture for one panchayat, with honesty about uncertainty.
Key UI elements / components	• Header: GP name, block, elevation, confidence pill • 5 day cards: icon, Tmax/Tmin, rain mm + probability %, RH, wind • "vs Block" row under each card (difference highlighted) • Line chart: 5-day Tmax/Tmin; bar chart: daily rain with probability overlay • Alert banner if thresholds crossed (heavy rain, heatwave) • Button: "Generate Crop Advisory"
Data shown	Per-day downscaled values, block values, rain probability, confidence, alerts
Main actions	Switch units; view charts; open S4; back to map

Low-fidelity wireframe

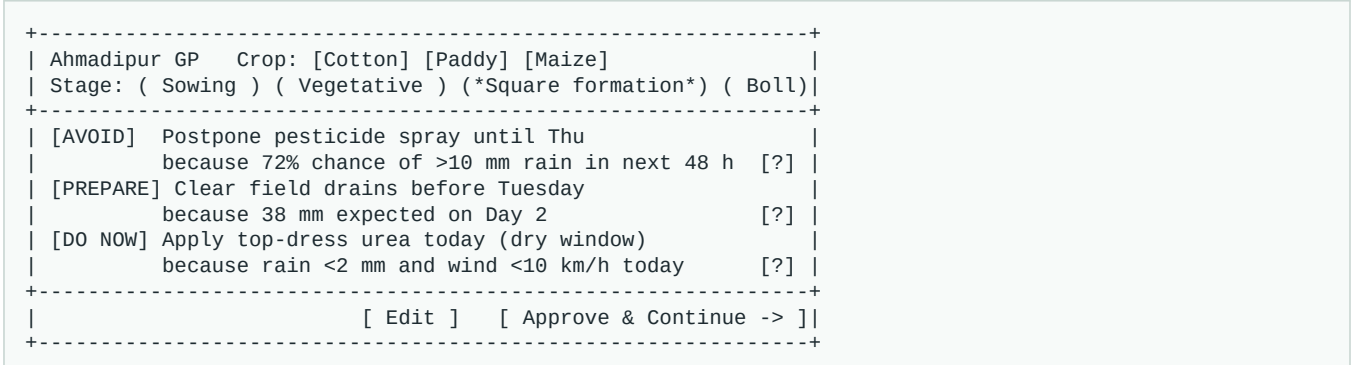


S4 Crop Advisory Generator

Demo step 4

Field	Details
Purpose	Turn the forecast into specific, prioritised actions for a crop and growth stage.
Key UI elements / components	• Crop selector (Cotton, Paddy, Maize) with icons; growth-stage chips • Advisory cards sorted by urgency: icon, action title, reason ("because..."), valid days • Colour tags: Do now (green) / Avoid (red) / Prepare (amber) • "Why this advice?" expandable: shows the rule and forecast values used • Edit button (officer can adjust text); "Approve" button
Data shown	Panchayat forecast Days 1-5; crop calendar; triggered rules and thresholds
Main actions	Select crop/stage; expand reasoning; edit; approve -> S5

Low-fidelity wireframe

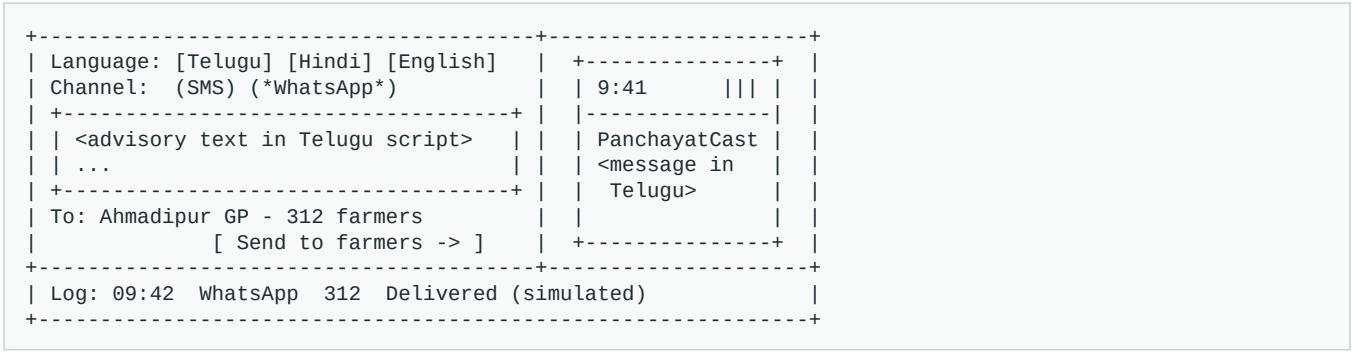


S5 Share & Farmer Preview

Demo step 5

Field	Details
Purpose	Deliver the advisory in the farmer's language and show exactly what the farmer receives.
Key UI elements / components	• Language tabs: Telugu / Hindi / English with character count • Channel toggle: SMS (short, 160-char aware) / WhatsApp (rich with emoji + link) • Recipient summary: "Ahmadipur GP - 312 registered farmers" • Phone mockup on the right showing the message arriving (animation) • Send log table: time, channel, recipients, status
Data shown	Approved advisory text, translations, recipient count, send history
Main actions	Switch language/channel; send (simulated); copy text; view log

Low-fidelity wireframe

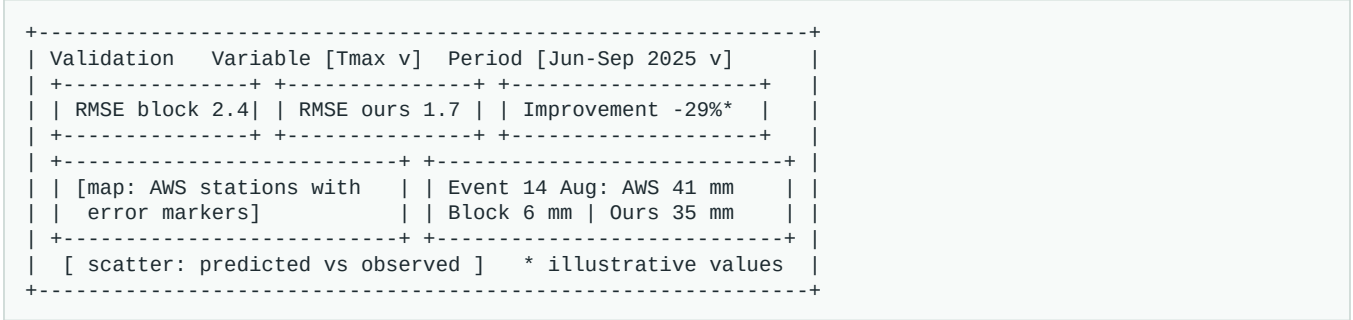


S6 Model Validation & Accuracy

Demo step 6

Field	Details
Purpose	Prove to officers and judges that panchayat forecasts beat the block baseline.
Key UI elements / components	• KPI cards: Temp RMSE (block vs PanchayatCast), Rain CSI, POD, FAR, with % improvement • Map of held-out AWS stations with error markers • Backtest event card: date, AWS observed vs block vs PanchayatCast (bar chart) • Scatter plot: predicted vs observed (Tmax) • Method note: "Stations not used in training"
Data shown	Validation metrics, station list, backtest event values
Main actions	Choose variable and period; click station for its time series

Low-fidelity wireframe



S7 Farmer Mobile View (public link)

Opened from the SMS/WhatsApp link

Field	Details
Purpose	A no-login, lightweight page a farmer can open on a basic smartphone.
Key UI elements / components	• Large GP name + today's weather icon and headline advice • 3 big action cards (icons + one line each) in Telugu • Swipeable 5-day strip; big fonts; high contrast • Buttons: "Listen" (text-to-speech, optional), "Did it rain today? Yes / No" (feedback) • Under 200 KB page; works on 2G/3G; cached for offline
Data shown	Panchayat forecast, approved advisory, confidence in plain words
Main actions	Read / listen; give rain feedback; share to WhatsApp group
